CAMO Engineer

Helicopter CAMO Engineer (m/f/d), full-time, Lisbon: What do you think about a nine-to-five job? Nah, nothing for you? We think so too! PRIMUS AERO is a service provider in various fields in the aviation industry, but our focus is on private jets and helicopters. We want to grow, not only in size but also in spirit, and this only works with the right people.

About you

- you have a degree in aeronautical, mechanical, or related engineering
- you have at least one year of experience in Part-M or Part-145
- you have Part-M or Part-145 training, and Human Factors training
- you have experience working with CAMP
- you have good English skills
- you show initiative, are proactive, and are highly motivated
- you are well-organized and willing to learn

Being a Helicopter CAMO Engineer at PRIMUS AERO Portugal involves

- providing continuing airworthiness technical support to the helicopter fleet
- preparing and updating maintenance processes
- updating flight hours in the system
- monitoring and developing a portfolio of clients in the B2B segment
- carrying out activities of prospecting and attracting new customers

Why you'll love working at PRIMUS AERO

- flexible working hours and the possibility to work from home
- familiar work climate in an attractive industry
- possibility for career development due to our current growth

Sounds interesting to you? We would love to hear from you! Remuneration is negotiable, depending on your expertise and skills. Candidates must hold a valid EU work permit. To join the team, send us your CV and application to office.pt@primus.aero
